

Complete Laboratory Solutions for Start-ups and Young Companies

20 Years
LifeScience

Consulting Network

Start-ups and young companies often have no access to borrowing at favorable terms such as through leasing, hire purchase or loans. At **Evosciences**, we have responded to this need with our start-up program, which is designed around enabling your company to finance laboratory equipment and analytical instruments, effectively and smoothly.

Procedure

- Procurement list and/or supplier offers
- Support in procuring equipment
- Non-binding financing offers
- Acceptance of finance offer
- Professional preparation of financial documents
- Processing of the credit application
- Establishing a credit line
- Eligible contracts

A customized financing program, the backing of a strong partner network, and expert advice tailored to your needs will enable you to bring your plans over the line quickly, efficiently and smoothly.

Requirements

- Valid business plan
- Financial plan with a three-year horizon
- Investor (HTGF, VC, etc.)
- Strategy for the next 18 months
- Equipment from established suppliers

We plan and build laboratory facilities and production plants for our clients in the life sciences and deep tech sectors.

What we offer:

- Laboratories – from biotech to quantum computing
- Bioprocessing, pilot & production facilities
- Makerspaces & workshops
- Offices & community spaces

We deliver fully equipped operational labs in just six to nine months.

We support growth and expansion into new lab and workspaces in a time- and cost-effective manner.

- Process-optimized laboratory and production planning
- Integrated design of offices and spaces for creative and collaborative work
- Process and requirements analysis
- Searching for and selecting the right location
- Approval and certification
- Planning technical building infrastructure
- Help with financing and cost-effective procurement of complete laboratory and work equipment
- Integration of the latest digital tools for efficient and reproducible laboratory work
- Modular & flexible planning concept

Laborkampagne is a purchasing community for smart start-ups and SMEs.

- Cost-effective purchasing for life science start-ups
- Procurement of laboratory equipment, consumables and chemicals

With **Laborkampagne**, you can source laboratory supplies from your suppliers – but at our top conditions.

You have your requirements – and what we have is the pooled bargaining power of our customers.

As a purchasing group, we can always negotiate better conditions than individual start-ups and SMEs.

Advantages

- No risk
- No catches
- Best conditions even for the smallest companies
